

School age

School age children are known as the middle years, these children are industrious, they are very competitive. 3R's has created learning centers to meet our afterschool children needs. The school agers are grouped by age (K-2) and grades (3-5). After school children sometimes feel they are too old to be in a child care setting, so we try and make it fun while assisting them with their homework. We provide an activity for those who do not have homework.

Lesson plans are prepared for school release days, we want to keep our students sharp as same for the summer, keeping our students on task is very important for to the staff at 3R's we want to help invest in the future o f the students enrolled at 3R's. We provide help in math, reading, spelling, writing, that's just a few of the subjects that we offer assistance. In the summer we provide school age activities and field trips.

Friendships are made and bonds are formed with the teachers in this program. We hire qualified staff to work with all of our students. It is very important for a child to create their own sense of belonging, that's why it's important to provide a safe and happy place to be at 3R's. Life is exciting to a school age child let the adventure begin, for both student and teacher.
